PROFILE

Architect trained at the University of Buenos Aires, with site experience in new build, extensions and refurbishment, and a parallel practice in photorealistic 3D visualisation.

I approach rendering as an exercise in fine architecture rather than an automatic process: how light behaves, how materials meet, how the human scale reads.

Available for freelance and remote collaboration with studios, developers and practices abroad.

SOFTWARE

Ps Photoshop	Su SketchUp
Ai Illustrator	Vr V-Ray
Ac AutoCAD	Lu Lumion
Rv Revit BIM	Of Office
